

Junior Mobile App/Software Developer/Intern

Location: Remote / On-site – Abuja, Nigeria

Job Type: Junior Developer (6-9 months)

Reports To: Senior Developer

1. Background

Instant Health Service is a company that is committed to transforming Healthcare delivery through an innovative X-ray diagnostic intelligence platform that enables real-time reading and reporting of critical health data. At Instant Health, we simplify health service provision through digitization and automation. Our multidisciplinary team comprises public health specialists, data scientists, and skilled software developers.

2. Objectives

The objective of this TOR is to engage a qualified Junior mobile App/software developer to design, develop, test, and maintain software solutions that meet the organization's requirements.

3. Job Summary:

We are looking for a passionate and proactive Junior Mobile App Developer/Intern to join our development team. As an intern, you will gain hands-on experience in building cross-platform mobile applications using React Native. This is a great opportunity to learn industry practices and work on real-world projects under the mentorship of experienced developers.

Key Responsibilities:

- Assist in developing and maintaining mobile applications
- Collaborate with designers and backend developers to implement user-friendly features.
- Participate in code reviews, daily standups, and team meetings.
- Test and debug applications to ensure optimal performance on Android and iOS platforms.
- Document your work clearly and contribute to the project's technical documentation.
- Continuously learn and stay updated with mobile development trends and best practices.

Requirements and Qualifications:

- Currently enrolled in or recently completed a degree in Computer Science, Software Engineering, or a related field.
- Basic understanding of JavaScript and React Native.
- Familiarity with REST APIs and mobile UI/UX principles.
- Willingness to learn new tools and technologies.
- Good communication and collaboration skills.
- Ability to work independently and in a team environment.

Nice to Have (Bonus Points):

- Experience using version control systems like Git.
- Familiarity with tools such as Expo, Firebase, or Redux.
- Basic knowledge of Android Studio or Xcode for native debugging.
- Projects or portfolio demonstrating your mobile development experience (even if academic or personal).

Work Conditions

- Location: Remote/On-site at Abuja as required.
- Working hours: 9 AM – 5 PM, Monday to Friday
- Equipment and software tools will be provided by the developer/Instant Health Services.

Benefit:

- Real-world experience in mobile app development.
- Mentorship from experienced developers.
- Opportunity to contribute to live projects used by real users.
- Flexible work environment.
- Potential for full-time employment after successful internship completion.
